

Grizzly Bear

February 14, 2005 - May 2, 2020

My sweet furry love of a lifetime. You've been gone from this Earth only 6 days & yet, it feels like so much longer to me. So many times I've caught myself looking for you, or begin to "talk" to you...and with tears falling, I have to catch myself & remind my broken heart that you're gone. By my side & my constant shadow since the day I brought you home...there was literally nowhere I could roam that you did not follow. You saw me through the absolute worst & most heartbreaking times of my life....you loved me back to "living" in 2015 when I thought my heart would never heal; and sat lovingly by my side as the rivers of tears fell onto your soft furry head. We were such a team...and I would brag to everyone that "I swear my Grizzly is mostly human". I was so proud to call you my best friend. You absolutely changed my life and taught me so much about all encompassing absolute love. I knew saying goodbye would hurt...but this pain caught me off guard. My heart hurts so much. I hate to admit how painful this the past week has been. I hope you knew how very very much you were loved. I hope you knew how hard I fought for you...right by your side, every time your cancer would return. Last Saturday's decision to let you go made me absolutely heartsick...but when you love anything the way I loved you, my broken heart took a backseat to my want for you to be pain free and peaceful. I know my Nana was there waiting for you as you crossed over the Rainbow Bridge...and right now, that's where I find my only peace. I know she'll love you to pieces bc she's the one who taught me how to love. My sweet boy... I'll miss you for the rest of my days. Thank you for loving me. I'll

never forget you. Until we meet again...
