

Harper

September 17, 2014 - July 7, 2024

We mourn the loss of our special little girl Harper. We brought her home in 2014 as a companion for our daughter who was diagnosed with cancer at the time. Harper was a person in a little dog body. She was the smartest dog we have ever had. We never had to train her, but she definitely trained us. She loved napping with her dad in bed. She had an attitude when you didn't do what she wanted. If I left an empty cup of milk on in the cup holder on the couch she would steal it as soon as I turned my back. She preferred her breakfast in bed. The house has been so quiet. Her absence is felt. She brought us such joy over the short 9 years of her life. With heavy hearts we say goodbye to her. We will always love her, and will miss her forever.
